About Extractors

Our company is focused on producing software and online advertising and has nine years of experience in Italy.

We began our activity in 2022. Our specialty is in processing advertisements using the latest and most advanced methods.

Our company has been officially registered in 2023 with the commercial number VID-03603466.

Our ultimate goal is to foster a vibrant and supportive community of colleagues, united by their shared interest in our projects and their profit potential. Join us and be a part of something bigger.

The community shares part of our projects' profits by visiting our customers' advertising pages. Some of these include producing the most up-to-date technologies in the world, precisely in the technology field.

Part of this company's future goals is to produce AI software and cooperate in large WEB3 projects in the cryptocurrencies and metaverse markets.

Our first project, a simple game named Extractors, has been designed and prepared in 6 separate but continuous and interconnected chapters.

The scientific support of this company is 12 years of continuous activity in the field of designing innovative financial strategies in investment markets and, later on, digital currency production with correct management principles in the blockchain space and the construction of advanced and modern NFT markets, which currently provides continuous services and consulting in these fields. Excellent for those interested in these markets.

How it Works

Extractors is a Play to earn game, but the difference between extractors and traditional apps is that you need to purchase packages, and your percentage yield depends on the package you are buying.

The game's design is a testament to our commitment to your success. With just a tiny amount of time each day, you can tap into a continuous stream of high profits by viewing advertisements and extracting the necessary points. This unique approach to gaming and advertising promises an exciting earning potential.

For the peace of mind and confidence of the participants in this game, the cash pool of this financial cycle will be added and locked monthly to provide a safe and profitable platform for the members of this large community.

Features

- Extractors have straightforward instructions.
- Users of the Extractor Application can start making money through this application by spending a little time a day and within any budget.
- Also, if you need help, check out our website for tutorials.
- One of Extractors' unique features is the ability to earn points and money by inviting friends to join. It's a win-win situation: friends enjoy the game, and you earn points added to your account once they've purchased their first package. So, why not share the fun and the rewards with your network?
- The Extractors game is designed in six seasons. The first season will start in March 2024 and last ten months; the sixth season will end in December 2030.
- In the highly anticipated first season of the game, only a select one million users will have the exclusive opportunity to register and participate, adding a sense of exclusivity and privilege to your gaming experience.
- There will be multiple giveaways and airdrops for active accounts.
- The possibility of members buying and selling account credit will be added in chapters 5 and 6.
- The possibility of stacking game currency will also be added for those interested in this sector, allowing them to make more profit and buy cheaper packages.
